Hi Jeff,

I was confusing names- I meant to copy your OSC backup for when you were out. Sorry for mix up.
Jim

Hi, James. I'm curious why you copied Beth Sheldrake. Beth is the manager of the Emergency Response Unit. Wally is the manager of the unit that covers removal actions, such as at the Pillon property.

To answer your questions, our warrant expires on 12/15 (a week from Saturday). We do anticipate completing the work we are authorized to do under the warrant by then. We will not have completed the monitoring well installations and groundwater sampling or any soil removal in the paint dump area and I do not know when we will be able to get that done. We have two issues working against us: 1) legal access to conduct the work and 2) scheduling of drillers, lab space, and our personnel.

Regarding your site visits, you will need to get access from Mr. Pillon unless Scott Marlow can help you determine whether you already have access.

Jeff/Beth:

We are developing cost estimates for removal of solid waste. I'd like to bring out our abandoned vehicle coordinator, Mary Impson the week after next (week of December 17) to conduct an inventory of vehicles and boats. I assume you will still be mobilized? We may also have an engineer come out to look at the debris pile/landfill but that may be after you demobilize. (That is just for future planning purposes). Should we also be contacting Mr. Pillon to confirm access? I understand he may not be available to respond.

Please advise.

Thanks-Jim
